

AASV Swine Influenza Committee Meeting
Saturday, March 2, 2012
7:30 – 9:30am
Cunningham B

Agenda:

1. Discussion on Vaccination Practices and Observed Efficacy
2. Current Influenza management strategies
3. Model of obtaining samples, identifying subtypes, and preparation of vaccines in a timely manner in the field
4. How do we facilitate a model that will allow a regional vaccine to be produced based on current field isolates?
5. Data comparing homologous to heterologous strains
6. Comparison of nasal swabs vs oral fluids for diagnostic sampling
7. Turnaround time on autogenous vaccine production
8. Can we use human model?
9. Status of IN vaccine
 - a. What are barriers to IN?
10. 10 year duration influenza vaccine
11. USDA national surveillance update
 - a. How to conduct with confidentiality and compliance?
12. Discussion of Recommendations for Fairs and Exhibitions
